INVESTMENT APPROACH

We use a bottom-up approach that seeks to identify companies with outstanding long-term growth potential. We look for companies with:

- Strong financials
- A sustainable competitive advantage
- Industry-best management teams
- Earnings growth greater than the relevant sector or industry

All cap flexibility with a focus on mid-cap companies

Approximately 20-40 positions

Composite returns for the Emerging Markets Select Composite have been provided. The Wasatch Emerging Markets Select Composite contains fully discretionary equity accounts following the Wasatch Emerging Markets Select style. The composite primarily invests in equity securities of all market capitalizations that are tied economically to emerging market countries with the goal of long-term appreciation of capital. For comparison purposes the composite is measured against the MSCI Emerging Markets Index. Wasatch Global Investors is an independent registered investment advisor.

Registration does not imply a certain level of skill or training. Wasatch Global Investors claims compliance with Global Investment Performance Standards (GIPS®). To receive a complete list and description of composites and/or a GIPS Composite Report, e-mail inforequest@wasatchglobal.com. Past performance is not indicative of future results. The U.S. Dollar is the currency used to express performance. Returns are presented both gross and net of investment management fees. Returns are preliminary.

MSCI makes no express or implied warranties or representations and shall have no liability whatsoever with respect to any MSCI data contained herein. The MSCI data may not be further redistributed or used to create indices or financial products. The MSCI Emerging Markets TR Net Index is a free float-adjusted market capitalization index designed to measure the equity market performance of emerging markets. You cannot invest directly in any index.

Portfolio Characteristics, Allocations, and Top Ten Holdings are derived from representative accounts following the Wasatch Emerging Markets Select style. Individual client accounts may differ from the representative accounts. Portfolio holdings are subject to risks and may change at any time. References to specific securities should not be construed as recommendations by the Advisor.

Est. 5-year EPS Growth %: Estimated percentage increase in earnings per share (EPS) per year of the fund's holdings over the next 5 years. Returns are not guaranteed and may be higher or lower. Source: Wasatch and FactSet. **P/E (Forward):** Sum of stock prices of the fund's holdings divided by the aggregate earnings per share of those holdings for the next 12 months calculated as a weighted harmonic average. **Weighted Average Market Cap:** Average market capitalization of companies held by the fund, weighted by their percentage of fund net assets. **Portfolio Turnover:** A measure of trading activity in a fund's portfolio over the past 12 months expressed as a percentage of the fund's average total assets. **Alpha** measures a fund's risk/reward potential. A positive alpha means the fund outperformed the index. A negative alpha means the fund underperformed the index. **Beta** measures a fund's risk in relation to the market. A beta of 0.8 means the fund's total return is likely to move up or down 80% of the market change; 1.25 means total return is likely to move up or down 25% more than the market. **R-Squared** measures (from 0 to 1.0) how closely a fund's movements are correlated with movements of its benchmark. An R-squared of 1.0 would mean that the fund's movements are completely correlated with the movements of its benchmark. **Active Share** measures the difference between portfolio holdings and the benchmark. It is the sum of the absolute values of the different weightings of each holding in the fund versus each holding in the benchmark, divided by 2. **Standard Deviation** measures the degree to which a fund's performance has varied from its average performance over a particular time period. The greater the standard deviation, the greater a fund's volatility (risk). **Upside Capture** explains how well a fund performs in time periods where the benchmark's returns are greater than zero. **Downside Capture** explains how well a fund performs in time periods where the benchmark's returns are less than zero.
