

# Wasatch Global Opportunities Fund

DECEMBER 31, 2019

## Maintaining A Long-Term Global Growth Perspective

### OVERVIEW

The Wasatch Global Opportunities Fund—Investor Class finished the fourth quarter with a gain of 10.00%, outperforming its benchmark MSCI AC (All Country) World Small Cap Index, which finished the period up 9.74%. For the 12 months ended December 31, 2019, the Fund returned 33.07%, outperforming the benchmark's return of 24.65% over the same period.

During the quarter, global markets broadly rose as investors responded favorably to macro developments, including an agreement on a "phase one" deal expected to resolve portions of the U.S.-China trade dispute. Both developed- and emerging-market holdings contributed during the quarter, although developed markets experienced a larger boost and added the most to the Fund's return.

On a country basis, the United States was the largest contributor to Fund performance followed by India and the United Kingdom. In all three countries, our holdings outperformed their benchmark counterparts.

Decisive election results had a positive effect on the U.K. market. While many analysts still worry about the potential outcome of Brexit, the election nonetheless provided a measure of clarity that has been rare in recent years, and investors seemingly felt optimistic about the

*Data show past performance and is not indicative of future performance. Current performance may be lower or higher than the data quoted. For the most recent month-end performance data, visit [wasatchglobal.com](http://wasatchglobal.com). Investment returns and principal value will fluctuate and shares, when redeemed, may be worth more or less than their original cost. The Advisor may absorb certain expenses, leading to higher total shareholder returns. Wasatch Funds will deduct a 2% redemption fee on Fund shares held 60 days or less. Performance data does not reflect this redemption fee or taxes. **Total Expense Ratio: Investor Class 1.55% / Institutional Class—Gross: 1.66%, Net: 1.36%. The Advisor has contractually agreed to limit certain expenses to 1.75% for the Investor Class and 1.35% for the Institutional Class through at least 1/31/2020.***

prospect of market-friendly policies in the U.K. Returns were also aided by the British pound's recovery.

Japan had a good quarter, adding to the Fund's return and performing in line with the benchmark's position in Japan. We believe our Japanese holdings have outstanding long-term growth potential and are well-positioned to achieve their business goals even in more uncertain macro environments. There was good news in early December as Japan's upper legislative house approved a U.S.-Japan trade deal introduced in September and passed by the lower legislative house in November. The deal, expected to go into effect in January 2020, will see more than \$7 billion in tariffs on U.S. goods reduced or removed in exchange for lower tariffs on Japanese industrial goods imported by the U.S.

Our lone holdings in China and Korea, which we mention below, both saw their share prices dip during the quarter, but the impact on the Fund's return was minor.

Four sectors collectively contained more than 80% of the Fund's assets—information technology, health care, industrials and financials. These four sectors contributed the most to the Fund's return for the fourth quarter and, with the exception of industrials, each sector outperformed its benchmark counterpart. The materials, consumer-discretionary and consumer-staples sectors were the main detractors from performance relative to the benchmark.

## DETAILS OF THE QUARTER

**Intra-Cellular Therapies, Inc. (ITCI)** was the most significant individual contributor. Shares of the company soared in December on news that its first product, CAPLYTA® (lumateperone), had received approval from the Food and Drug Administration (FDA) for the treatment of schizophrenia in adults. The drug is currently in development for the treatment of bipolar

depression, Alzheimer's disease and other neurological conditions. With readouts from these trials expected to begin soon, we think the additional upside potential for CAPLYTA remains considerable.

**AU Small Finance Bank Ltd.** was the second-largest individual contributor during the quarter. The bank is based in India, which was the second-largest contributor on a country basis, and primarily serves unbanked and underbanked low- and middle-income individuals and small businesses. Conversion from a non-bank vehicle-finance company to a small finance bank in 2017 has provided access to deposit-based funding that has improved profitability. Profit after tax at AU Small Finance Bank jumped 89% in its most-recent quarter compared to the same quarter a year ago. Management cited improved operational efficiency at the bank's branches.

Another top contributor to Fund performance for the quarter was **Pennant Group, Inc. (PNTG)**, a provider of home health care and nursing services. Pennant is the second successful spin-off of **Ensign Group, Inc. (ENSG)** in the past five years. (Incidentally, Ensign is another of the Fund's current holdings.) Pennant's stock was up on news that total revenue for the most-recently reported quarter rose 21.2% versus the same period a year ago. Revenue for the home health and hospice services segment increased 25.9%, and revenue for the senior living services segment grew 14.1%.

The largest individual detractor for the fourth quarter was **LGI Homes, Inc. (LGIH)**, which designs and builds homes with "great value and great prices in excellent locations" throughout Texas, Arizona, New Mexico, Colorado, Georgia, North Carolina, Florida and Washington. We think LGI's stock was down because mortgage interest rates have risen somewhat from their recent lows. But we still like LGI because the company remains focused on providing affordable homes—which show high demand without adequate supply in

LGI's target markets—and because signs point to accommodative monetary conditions for a long time going forward.

As mentioned above, our only Chinese holding, **Vitasoy International Holdings Ltd.**, was the second-largest detractor for the quarter. A multinational based in Hong Kong, Vitasoy offers soy milk, tofu, rice milk, tea, juices and related food-and-beverage products in China and other countries. Investors reacted negatively to Vitasoy's plans to invest more heavily in its soy-milk business to stave off competitive pressures and pave the way for future growth. We think the company's strategy makes sense, however—especially in view of the large untapped potential for packaged soy milk and Vitasoy's strong brand presence in the markets it serves.

**Medytox, Inc.**, our lone Korean holding, was the third-largest detractor. Medytox manufactures neurotoxins for cosmetic applications. Concerns about the pending approval of the company's products for sale in China continued to weigh on shares of Medytox. Meanwhile, the company's lawsuit against a pair of competitors—which seeks to block U.S. imports of a rival product—have created an additional layer of uncertainty around the stock. On the plus side, a recent inspection of the company's manufacturing facilities by Korea's Ministry of Food and Drug Safety failed to uncover any serious problems, thus removing a potential obstacle to Chinese approval. *(Current and future holdings are subject to risk.)*

## OUTLOOK

The fourth quarter provided a solid end to what was a strong year for the Fund. Internationally, markets generally rose, but signs of slowing global growth still persisted.

During December, most developed markets posted solid returns to close out a strong year. In the U.S., the S&P 500® Index rose 31.49% for the 12

months ended December 31, 2019, its best return since 2013. Meanwhile, the U.K. showed early signs of casting off the shadow of uncertainty created by Brexit that has loomed for nearly four years.

As was the case during the fourth quarter, a falling U.S. dollar is generally helpful to emerging markets. Weakness in the greenback can become self-reinforcing, as outsized equity gains and stronger economic growth in emerging markets pull investment away from the U.S., further impacting the dollar. Conversely, a strong U.S. dollar can pose headwinds to emerging-market investments. Countries with structurally weak currencies are especially vulnerable to dollar strength, which may compel them to adopt overly restrictive monetary and fiscal policies in order to attract and retain foreign capital.

Although U.S. stocks generally notched significant gains during the fourth quarter, we don't necessarily view this as a sign of overexuberance. For one, after a large downturn toward the end of 2018, stocks started 2019 well off their highs. For another, price/earnings multiples for profitable companies are lower today than two years ago.

On the topic of growth-oriented investment strategies, one of the most interesting articles we've read recently is entitled "A Mysterious Force Took Over Investing. I Know What It Is." The article appeared in *Institutional Investor* and was written by Christopher Schelling of Texas Municipal Retirement System.

In contrasting growth versus value, Mr. Schelling explains, "On the other hand, growth is perhaps harder to spot. It's not just that doing so involves making simple forecasts about the future—computers generally beat humans at that, too, by the way—but it requires something more than that. In my experience, successful growth investors have an

ability to synthesize unstructured data across multiple, often seemingly unrelated, domains.”

Mr. Schelling goes on to point out, “In a world of information asymmetry and fairly high average economic growth—as existed 40 years ago, when the ability and effort needed to dig through physical copies of opaque financial statements resulted in a clear informational edge for those who did it—value looked like alpha. But perhaps today, in a low-growth world of data ubiquity, with a Bloomberg on every desk, where computers have eaten all the value, growth looks more like alpha.”

As growth-oriented investors ourselves, we agree with Mr. Schelling that the way we create alpha is to go beyond the numbers. While the numbers may help show us where we need to dig further, on-the-ground research is what gives us the perspective to decide which management teams, products, services and marketplace

dynamics have the potential to enable a company to double in size many times over.

Although we don’t know for sure which of our current holdings will be the next success stories, the search for such dynamic growth-oriented companies is what energizes us every day that we come to work. And we believe that employing our patient, bottom-up approach is the best way we can serve Fund shareholders.

Thank you for the opportunity to manage your assets.

Sincerely,

JB Taylor, Ajay Krishnan, Ken Applegate and Paul Lambert

## AVERAGE ANNUAL TOTAL RETURNS

FOR PERIODS ENDED DECEMBER 31, 2019

	Quarter*	1 Year	3 Years	5 Years	10 Years
Global Opportunities Fund—Investor	10.00%	33.07%	19.37%	10.93%	11.71%
Global Opportunities Fund—Institutional	9.97%	33.34%	19.70%	11.10%	11.79%
MSCI AC World Small Cap Index**	9.74%	24.65%	9.73%	7.85%	9.71%

\*Returns less than one year are not annualized.

Data show past performance, which is not indicative of future performance. Current performance may be lower or higher than the data quoted. To obtain the most recent month-end performance data available, please visit [wasatchglobal.com](http://wasatchglobal.com). The Advisor may absorb certain Fund expenses, without which total return would have been lower. Investment returns and principal value will fluctuate and shares, when redeemed, may be worth more or less than their original cost. **Total Expense Ratio: Investor Class—1.55% / Institutional Class—Gross: 1.66%, Net: 1.36%**

Total Annual Fund Operating Expenses include operating expenses, including the management fee, before any expense reimbursements by the Advisor. **The Advisor has contractually agreed to limit certain expenses to 1.75% for the Investor Class and 1.35% for the Institutional Class through at least 1/31/2020.** See the prospectus for additional information regarding Fund expenses.

Wasatch Funds will deduct a 2.00% redemption fee on Fund shares held 60 days or less. Performance data does not reflect the deduction of fees or taxes, which if reflected, would reduce the performance quoted. For more complete information including charges, risks and expenses, read the prospectus carefully.

Performance for the Institutional Class prior to 2/1/2016 is based on the performance of the

Investor Class. Performance of the Fund's Institutional Class prior to 2/1/2016 uses the actual expenses of the Fund's Investor Class without any adjustments. For any such period of time, the performance of the Fund's Institutional Class would have been substantially similar to, yet higher than, the performance of the Fund's Investor Class, because the shares of both classes are invested in the same portfolio of securities, but the classes bear different expenses.

Investing in small and micro cap funds will be more volatile and loss of principal could be greater than investing in large cap or more diversified funds. Investing in foreign securities, especially in emerging and frontier markets, entails special risks, such as currency fluctuations and political uncertainties, which are described in more detail in the prospectus. Investments in emerging markets are subject to the same risks as other foreign securities and may be subject to greater risks than investments in foreign countries with more established economies and securities markets.

**An investor should consider investment objectives, risks, charges and expenses carefully before investing. To obtain a prospectus, containing this and other information, visit [wasatchglobal.com](http://wasatchglobal.com) or call 800.551.1700. Please read the prospectus carefully before investing.**

*The Wasatch Global Opportunities Fund's investment objective is long-term growth of capital.*

*Alpha is a risk-adjusted measure of the so-called "excess return" on an investment. It is a common measure of assessing an active manager's performance as it is the return in excess of a benchmark index or "risk-free" investment. The difference between the fair and actually expected rates of return on a stock is called the stock's alpha.*

*Brexit is an abbreviation for "British exit," which refers to the June 23, 2016 referendum whereby British citizens voted to exit the European Union. The referendum roiled global markets, including currencies, causing the British pound to fall to its lowest level in decades.*

*The price/earnings (P/E) ratio, also known as the P/E multiple, is the price of a stock divided by its earnings per share.*

*The S&P 500 Index includes 500 of the United States' largest stocks from a broad variety of industries. The Index is unmanaged and is a commonly used measure of common stock total return performance.*
