INVESTMENT APPROACH

We use a bottom-up approach that seeks to identify companies with outstanding long-term growth potential. We look for companies with:

- Strong financials
- A sustainable competitive advantage
- Industry-best management teams
- Price-to-earnings ratios around our expected 5-year earnings growth rate

Primarily invests in companies outside the U.S. with market caps of less than \$1.5 billion at the time of purchase

Approximately 80-120 positions

Composite returns for the International Micro Cap Composite have been provided. The Wasatch International Micro Cap Composite contains fully discretionary equity accounts following the Wasatch International Micro Cap style. The composite primarily invests in foreign micro cap companies with the goal of long-term growth of capital. For comparison purposes the composite is measured against the MSCI AC World Ex-U.S.A. Small Cap and MSCI World Ex-U.S.A. Small Cap indices. Wasatch Global Investors is an independent registered investment advisor. Registration does not imply a certain level of skill or training. Wasatch Global Investors claims compliance with Global Investment Performance Standards (GIPS®). To receive a complete list and description of composites and/or a GIPS-compliant presentation, e-mail inforequest@wasatchglobal.com. Past performance is not indicative of future results. The U.S. Dollar is the currency used to express performance. Returns are presented both gross and net of investment management fees. Returns are preliminary.

MSCI makes no express or implied warranties or representations and shall have no liability whatsoever with respect to any MSCI data contained herein. The MSCI data may not be further redistributed or used to create indices or financial products. The MSCI AC World Ex-U.S.A. Small Cap Index is an unmanaged index representing developed and emerging markets, excluding securities of U.S. issuers. The MSCI World Ex-U.S.A. Small Cap Index is an unmanaged index representing 22 developed markets, excluding the United States. You cannot invest directly in any index.

Est. 5-year EPS Growth %: Estimated percentage increase in earnings per share (EPS) per year of the fund's holdings over the next 5 years. Returns are not guaranteed and may be higher or lower. Source: Wasatch and FactSet. **P/E (Forward):** Sum of stock prices of the fund's holdings divided by the aggregate earnings per share of those holdings for the next 12 months calculated as a weighted harmonic average. **Weighted Average Market Cap:** Average market capitalization of companies held by the fund, weighted by their percentage of fund net assets. **Portfolio Turnover:** A measure of trading activity in a fund's portfolio over the past 12 months expressed as a percentage of the fund's average total assets. **Alpha** measures a fund's risk/reward potential. A positive alpha means the fund outperformed the index. A negative alpha means the fund underperformed the index. **Beta** measures a fund's risk in relation to the market. A beta of 0.8 means the fund's total return is likely to move up or down 80% of the market change; 1.25 means total return is likely to move up or down 25% more than the market. **R-Squared** measures (from 0 to 1.0) how closely a fund's movements are correlated with movements of its benchmark. An R-squared of 1.0 would mean that the fund's movements are completely correlated with the movements of its benchmark. **Active Share** measures the difference between portfolio holdings and the benchmark. It is the sum of the absolute values of the different weightings of each holding in the fund versus each holding in the benchmark, divided by 2. **Standard Deviation** measures the degree to which a fund's performance has varied from its average performance over a particular time period. The greater the standard deviation, the greater a fund's volatility (risk). **Upside Capture** explains how well a fund performs in time periods where the benchmark's returns are greater than zero. **Downside Capture** explains how well a fund performs in time periods where the benchmark's returns are less than zero.
