INVESTMENT APPROACH

We use a bottom-up approach that seeks to identify companies with outstanding long-term growth potential. We look for the following types of companies:

- High growth: companies with minimum annual earnings growth of 20%
- Core growth: high-quality, stable growing companies
- Fallen angels: growth companies that have suffered a temporary setback

Primarily invests in companies with market caps of less than \$1.5 billion at the time of purchase

Approximately 50-80 positions

Composite returns for the Micro Cap Growth - U.S. Composite have been provided. The Wasatch Micro Cap Growth - U.S. Composite contains fully discretionary equity accounts following the Wasatch Micro Cap Growth - U.S. style. The composite primarily invests in growing micro cap companies with the goal of long-term growth of capital. Income is an objective only when consistent with long-term growth of capital. The strategy prohibits investments in securities that trade on foreign exchanges. For comparison purposes the composite is measured against the Russell Microcap[®] and Russell 2000[®] indices. Wasatch Global Investors is an independent registered investment advisor. Registration does not imply a certain level of skill or training. Wasatch Global Investors claims compliance with Global Investment Performance Standards (GIPS[®]). To receive a complete list and description of composites and/or a GIPS Composite Report, e-mail inforequest@wasatchglobal.com. Past performance is not indicative of future results. The U.S. Dollar is the currency used to express performance. Returns are presented both gross and net of investment management fees. Returns are preliminary.

All rights in the Russell Indexes vest in the relevant London Stock Exchange Group plc (collectively, the "LSE Group"), which owns these indexes. Russell[®] is a trademark(s) of the relevant LSE Group company and is used by any other LSE Group company under license. These indexes are calculated by or on behalf of FTSE International Limited or its affiliate, agent or partner. The LSE Group does not accept any liability whatsoever to any person arising out of (a) the use of, reliance on or any error in the Index or (b) investment in or operation of the Portfolio. The LSE Group makes no claim, prediction, warranty or representation either as to the results to be obtained from the Portfolio or the suitability of these indexes for the purpose to which they are being put by Wasatch Global Investors. The Russell Microcap TR Index is an unmanaged total return index of the smallest 1,000 securities in the small cap Russell 2000 Index and the next smallest 1,000 companies based on a ranking of U.S. equities by market capitalization. You cannot invest directly in any index.

Est. 5-year EPS Growth %: Estimated percentage increase in earnings per share (EPS) per year of the funds holdings over the next 5 years. Returns are not guaranteed and may be higher or lower. Source: Wasatch and FactSet. **P/E (Forward):** Sum of stock prices of the fund's holdings divided by the aggregate earnings per share of those holdings for the next 12 months calculated as a weighted harmonic average. **Weighted Average Market Cap:** Average market capitalization of companies held by the fund, weighted by their percentage of fund net assets. **Portfolio Turnover:** A measure of trading activity in a fund's portfolio over the past 12 months expressed as a percentage of the fund's average total assets. **Alpha** measures a fund's risk/reward potential. A positive alpha means the fund outperformed the index. A negative alpha means the fund underperformed the index. **Beta** measures a fund's risk in relation to the market. A beta of 0.8 means the fund's total return is likely to move up or down 80% of the market change; 1.25 means total return is likely to move up or down 25% more than the market. **R-Squared** measures (from 0 to 1.0) how closely a fund's movements are correlated with movements of its benchmark. An R-squared of 1.0 would mean that the fund's movements are completely correlated with the movements of its benchmark. **Active Share** measures the difference between portfolio holdings and the benchmark. It is the sum of the absolute values of the different weightings of each holding in the fund versus each holding in the benchmark, divided by 2. **Standard Deviation** measures the degree to which a fund's performance has varied from its average performance over a particular time period. The greater the standard deviation, the greater a fund's volatility (risk). **Upside Capture** explains how well a fund performs in time periods where the benchmark's returns are greater than zero. **Downside Capture** explains how well a fund performs in time periods where the benchmark's returns are less than zero.
