Returns for periods less than one year are not annualized.

Data shows past performance and is not indicative of future performance. Current performance may be lower or higher than the data quoted. For the most recent month-end performance data, visit wasatchglobal.com. Investment returns and principal value will fluctuate and shares, when redeemed, may be worth more or less than their original cost. The Advisor may absorb certain expenses, without which total returns would have been lower. Wasatch Funds will deduct a 2% redemption fee on Fund shares held 60 days or less. Performance data does not reflect this redemption fee or taxes.

The fund is new with a limited operating history.

The Fund uses short selling which incurs significant additional risk, including the risk of unlimited losses. Equity investing involves risks, including potential loss of the principal amount invested. Being non-diversified, the Fund can invest a larger portion of its assets in the stocks of a limited number of companies than a diversified fund. Non-diversification increases the risk of loss to the Fund if the values of these securities decline. Securities in the Fund are generally added to the portfolio as long or short positions based upon security rankings provided by multi-factor quantitative models and on fundamental analysis of securities. The reliance on quantitative models entails risks, including that a model may be limited or incorrect, that the data on which a model relies may be incorrect or incomplete and that the Advisor may not be successful in selecting companies for investment in the Funds portfolio. The Advisor will generally sell a security if, among other things, the rankings provided by the quantitative models decline and/or research analysis reveals a deterioration of the company fundamentals. Fund Objective: Long-term growth of capital

An investor should consider investment objectives, risks, charges and expenses carefully before investing. To obtain a prospectus, which contains this and other information, visit wasatchglobal.com or call 800.551.1700. Please read the prospectus carefully before investing.

Index represents Russell 2500™ Index.

All rights in the Russell Indexes vest in the relevant London Stock Exchange Group plc (collectively, the "LSE Group"), which owns these indexes. Russell® is a trademark(s) of the relevant LSE Group company and is used by any other LSE Group company under license. These indexes are calculated by or on behalf of FTSE International Limited or its affiliate, agent or partner. The LSE Group does not accept any liability whatsoever to any person arising out of (a) the use of, reliance on or any error in the Index or (b) investment in or operation of the Fund. The Russell 2500 Index is a market-cap weighted index that includes the smallest 2,500 small- and mid-cap stocks covered in the broad-based Russell 3000 of U.S.-based listed equities. The Citigroup 3-Month U.S. Treasury Bill Index measures monthly return equivalents of yield averages that are not marked to market. The 3-Month Treasury Bill Indexes consist of the last three 3-month Treasury bill issues.

Est. 5-year EPS Growth %: Estimated percentage increase in earnings per share (EPS) per year of the funds holdings over the next 5 years. Returns are not guaranteed and may be higher or lower. Source: Wasatch and FactSet. **P/E Ratio (forward):** Sum of stock prices of the fund's holdings divided by the aggregate earnings per share of those holdings for the next 12 months. **Market Cap:** Weighted average market capitalization of companies held by the fund, median is the midpoint. **Alpha** measures a fund's risk/reward potential. A positive alpha means the fund outperformed the index. A negative alpha means the fund underperformed the index. **Beta** measures a fund's sensitivity to market movements. The beta of the market is 1.00 by definition. **R-Squared** measures (from 0 to 1.0) how closely a fund's movements are correlated with movements of its benchmark. An R-squared of 1.0 would mean that the fund's movements are completely correlated with the movements of its benchmark. **Standard Deviation** measures the degree to which a fund's performance has varied from its average performance over a particular time period. The greater the standard deviation, the greater a funds volatility (risk). **Sharpe Ratio** is calculated using standard deviation and excess return to determine reward per unit of risk. The higher the Sharpe ratio, the better the fund's risk-adjusted performance.

Wasatch Funds are distributed by ALPS Distributors, Inc.

Fund holdings are subject to risks and may change at any time. References to specific securities should not be construed as recommendations by the Fund or its Advisor.
