

International Small Cap Growth Composite

AS OF MARCH 31, 2024

Highlights

- Seeks the highest-quality small-cap growth companies outside the U.S.
- Truly active, collaborative, bottom-up, fundamental process
- Systematic coverage of the developed small-cap universe
- Broad sector and country approach

Portfolio Facts

\$1.4B / **\$5B** / **63**
Total Strategy Assets^ / Average Market Cap (weighted) / Number of Holdings

INVESTMENT APPROACH

We use a bottom-up approach that seeks to identify companies with outstanding long-term growth potential. We look for companies with:

- Strong financials
- A sustainable competitive advantage
- Industry-best management teams
- Earnings growth greater than the relevant sector or industry

Primarily invests in companies outside the U.S. with market caps of less than \$5 billion at the time of purchase

Approximately 60-90 positions

Composite returns for the International Small Cap Growth Composite have been provided. The Wasatch International Small Cap Growth Composite contains fully discretionary equity accounts following the Wasatch International Small Cap Growth style. The composite primarily invests in foreign small cap growth companies with the goal of long-term growth of capital. For comparison purposes the composite is measured against the MSCI AC World Ex-U.S.A. Small Cap and MSCI World Ex-U.S.A. Small Cap indices. Wasatch Global Investors is an independent registered investment advisor. Registration does not imply a certain level of skill or training. Wasatch Global Investors claims compliance with Global Investment Performance Standards (GIPS®). To receive a complete list and description of composites and pooled funds and/or a GIPS Composite Report, e-mail inforequest@wasatchglobal.com. Past performance is not indicative of future results. The U.S. Dollar is the currency used to express performance. Returns are presented both gross and net of investment management fees. Actual fees will vary depending on, among other things, the applicable fee schedule and portfolio size. Some portfolio net-of fees returns may be net of performance-based fees. See Wasatch Global Investors Form ADV Part 2A for more information on fee schedules. Current performance may be lower or higher than the performance data quoted. Returns are preliminary. Portfolio Characteristics, Allocations, and Top Ten Holdings are derived from representative accounts following the Wasatch International Small Cap Growth style. Individual client accounts may differ from the representative accounts. Portfolio holdings are subject to risks and may change at any time. References to specific securities should not be construed as recommendations by the Advisor.

Est. 5-year EPS Growth %: Estimated percentage increase in earnings per share (EPS) per year of the fund's holdings over the next 5 years. Returns are not guaranteed and may be higher or lower. Source: Wasatch and FactSet. **P/E (Forward):** Sum of stock prices of the fund's holdings divided by the aggregate earnings per share of those holdings for the next 12 months calculated as a weighted harmonic average. **Weighted Average Market Cap:** Average market capitalization of companies held by the fund, weighted by their percentage of fund net assets. **Portfolio Turnover:** A measure of trading activity in a fund's portfolio over the past 12 months expressed as a percentage of the fund's average total assets. **Alpha:** measures a fund's risk/reward potential. A positive alpha means the fund outperformed the index. A negative alpha means the fund underperformed the index. **Beta:** measures a fund's risk in relation to the market. A beta of 0.8 means the fund's total return is likely to move up or down 80% of the market change; 1.25 means total return is likely to move up or down 25% more than the market. **R-Squared:** measures (from 0 to 1.0) how closely a fund's movements are correlated with movements of its benchmark. An R-squared of 1.0 would mean that the fund's movements are completely correlated with the movements of its benchmark. **Active Share:** measures the difference between portfolio holdings and the benchmark. It is the sum of the absolute values of the different weightings of each holding in the fund versus each holding in the benchmark, divided by 2. **Standard Deviation:** measures the degree to which a fund's performance has varied from its average performance over a particular time period. The greater the standard deviation, the greater a fund's volatility (risk). **Upside Capture:** explains how well a fund performs in time periods where the benchmark's returns are greater than zero. **Downside Capture:** explains how well a fund performs in time periods where the benchmark's returns are less than zero.
